**DETAILED ACTION**

***Election/Restrictions***

1. Claim 1 is withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement.

***Priority***

2. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

***Drawings***

2. The drawings are objected to because the drawing is labeled "Fig. 1", which should be deleted, as it is the only figure in the application. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

***Specification***

3. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such

Art Unit: 1754

as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

4. The abstract of the disclosure is objected to because the term "means" is used in line 6. Correction is required. See MPEP § 608.01(b).

5. The disclosure is objected to because of the following informalities: the figure is referred to as "Fig. 1", which should be changed to "the figure", since there is only one figure in the application.

Appropriate correction is required.

#### ***Allowable Subject Matter***

6. Claim 2 is allowed.

7. The following is a statement of reasons for the indication of allowable subject matter: The combination of means for continuously supplying and heating calcium or barium oxide and means for agitating/moving calcium or barium halide in the apparatus for treatment of organic halide at 400-700 degrees

Celsius would not have been obvious to one of ordinary skill in the art at the time the invention was made.

**Conclusion**

8. Smith et al. US 5,417,934 discloses a dry exhaust conditioning apparatus for gases derived from semiconductor etching (see figure, Examples).

9. This application is in condition for allowance except for the following formal matters:

The abstract and drawing are objected to and Applicant has not yet canceled nonelected claim 1.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
